

# CERTIFIED ETHICAL HACKING TRAINING

TECHNOLOGY SOLUTIONS  
FOR SMART BUSINESS™

## About the course:

The Cairo Systems developed course integrates four key aspects into the program:

- Instructor Lecture/Discussion
- Hands-On Practice Activities
- Practice Test Software
- Student Dedication

## Course Includes

- Certified Ethical Hacker Instructors
- EC-Council Authorized Courseware
- Boson® Practice Test Software
- Prometric Exam voucher
- Dedicated equipment for each student

## Course Options

- Flexible schedules including day, evening or weekend sessions
- Dedicated classes for your organization
- Catering

**EC-Council**

Accredited Training Center

Cairo Systems, LLC can offer your organization Certified Ethical Hacker training. If you want to stop hackers from invading your network, first you've got to invade their minds.

The goal of the ethical hacker is to help the organization take preemptive measures against malicious attacks by attacking the system himself; all the while staying within legal limits. This philosophy stems from the proven practice of trying to catch a thief, by thinking like a thief. As technology advances and organization depend on technology increasingly, information assets have evolved into critical components of survival.

If hacking involves creativity and thinking 'out-of-the-box', then vulnerability testing and security audits will not ensure the security proofing of an organization. To ensure that organizations have adequately protected their information assets, they must adopt the approach of 'defense in depth'. In other words, they must penetrate their networks and assess the security posture for vulnerabilities and exposure.

The CEH Program certifies individuals in the specific network security discipline of Ethical Hacking from a vendor-neutral perspective. The Certified Ethical Hacker certification will fortify the application knowledge of security officers, auditors, security professionals, site administrators, and anyone who is concerned about the integrity of the network infrastructure. A Certified Ethical Hacker is a skilled professional who understands and knows how to look for the weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a malicious hacker.

To achieve the **Certified Ethical Hacker Certification**, you must pass the CEH exam 312-50

Call Cairo Systems, LLC today at 703-751-4902 to see how we can help your organization meet its high quality technical training needs.
