- Dedicated classes for your organization
- Catering
- Exam Voucher included in tuition

CompTIA A+ certification is an international industry credential that validates the knowledge of computer service technicians with the equivalent of 500 hours of hands-on experience. Major hardware and software vendors, distributors and resellers accept CompTIA A+ as the standard in foundation-level, vendor-neutral certification for service technicians. The exams cover a broad range of hardware and software technologies, but are not bound to any vendor-specific products. The skills and knowledge measured by the CompTIA A+ exams were derived from an industry-wide and worldwide job task analysis. To date, more than 500,000 individuals have obtained CompTIA A+ certification.

Earning CompTIA A+ certification proves that a candidate has a broad base of knowledge and competency in core hardware and operating system technologies including installation, configuration, diagnosing, preventive maintenance and basic networking.

The A+ program consists of 2 courses and corresponding exams. Below are the listed course titles and corresponding number of days for each class.

CompTIA A+ Core Hardware	5 days
CompTIA A+ Operating Systems	5 days

In addition to high quality training each student is provided practice test voucher from the Industry's de facto test provider, Transcender for each course that they take with Cairo Systems.

Give us a call today to see how Cairo Systems' A+ program meets the training requirements for the IT professionals that are on staff in your organization.
