Cairo Systems, LLC is pleased to now offer their proven, high quality training in Security+, the international standard for foundation level security certification.

CompTIA, the international trade association representing the interests of the information technology industry introduced the Security+ program in response to the increasing demand for security professionals. Highly regarded for their entry level, vendor neutral exams, CompTIA is uniquely qualified to set the standard in foundation level security certification. The Security+ certification has gained significant acceptance since its introduction and is ranked as the 2nd "hottest" certification for 2003 by CertCities.

Encompassing a broad range of security knowledge areas, the Security+ certification is the benchmark for foundation level security professionals. This five day course will help the student gain the specific skills necessary to implement basic security services on any type of network.

The course will focus on the following domains as outlined by CompTIA:

- General security concepts
- Communication security
- Infrastructure security
- Basics of cryptography,
- Operational/organizational security

For more information regarding the Cairo Systems Security+ training program, or other additional information technology training programs please contact 703-751-4902.
