Cairo Systems, LLC is pleased to now offer their proven, high quality training in the Microsoft Certified Systems Administrator program, Microsoft's entry and mid level network certification targeted at IT professionals.

The Microsoft Certified Systems Administrator (MCSA) on Microsoft Windows® 2003 credential is the ideal certification for professionals who manage and administer networks based on the Microsoft Windows XP/2003 platform. Listed below are the courses that match to the corresponding certifications that Microsoft requires to receive the MCSA title.

Course 2274 - Managing a Microsoft Windows Server 2003 Environment	5 days
Course 2275 - Maintaining a Microsoft Windows Server 2003 Environment	3 days
Course 2276 - Implementing Server 2003 Network Infrastructure: Network Hosts	2 days
Course 2277 - Implementing, Managing, and Maintaining a Microsoft Windows 2003 Network Infrastructure: Network Services	5 days
Course 2272—Implementing and Supporting Microsoft Windows XP Professional	5 days
Course 2159—Deploying and Managing Microsoft Internet Security and Acceleration Server 2000	3 days

In addition to high quality training each student is provided a practice test voucher from the Industry's de facto test provider, Transcender, for each course that they take with Cairo Systems.

For more information regarding the MCSA training program on Windows Server 2003, or other additional information technology training programs please contact 703-751-4902.
